Website: <https://ahmadyaseen.com>

SUMMARY

Cloud engineer with a full-stack SaaS background building products that span application code, AWS fundamentals, deployment workflows, infrastructure ownership, and production operations.

Built and operated revenue-generating SaaS products including Stumbnail and ClawPilot, with hands-on work across managed compute provisioning, virtual machine operations, agent runtime operations, monitoring, security, web platforms, AI integrations, databases, and user-facing product delivery.

EXPERIENCE

Founder & Cloud / Full-Stack Engineer

2025 - Present

ClawPilot - <https://clawpilot.app>

- Built and operate a cloud-native SaaS platform for managed OpenClaw and Hermes Agent workflows.
- Provision user compute environments automatically and manage virtual machines that run customer agent workloads.
- Operate agent runtimes, monitoring routines, and production service availability for users who need persistent hosted access.
- Own application deployment, infrastructure decisions, backend services, network access, security considerations, and operational follow-through for the product.
- Merged the earlier Hermes Agent hosting work into ClawPilot so the hosting capability is part of the main platform rather than a standalone app.

Founder & Full-Stack SaaS Engineer

2024 - Present

Stumbnail - <https://stumbnail.com>

- Built an AI-powered YouTube thumbnail SaaS from product concept through launch and paid user operation.
- Developed the AI image generation workflow, real-time canvas editor, user dashboard, authentication, storage, and supporting backend services.
- Deployed and maintained the application stack while iterating on a product with recurring revenue and real customer usage.
- Worked across frontend, backend, data storage, third-party AI APIs, and production delivery as the solo builder.

Developer

2025 - 2026

Pixelar - <https://pixelar.dev>

- Led R&D work on generative models for 2D animation and sprite synthesis.
- Built tooling intended to reduce asset creation friction for game developers.

Incubatee

2025

National Incubation Center (NIC)

- Selected for a startup acceleration program while growing Stumbnail.

PROJECTS

ClawPilot - <https://clawpilot.app>

Cloud-native managed AI assistant platform with automated user machine provisioning and hosted agent runtime operations.

- Provision and manage compute for hosted customer workloads.
- Operate Hermes Agent hosting as part of the ClawPilot platform.
- Built with Next.js, TypeScript, Node.js, Supabase, and DigitalOcean.

Tools: Cloud Native, Agent Runtimes, Next.js, TypeScript, Supabase, DigitalOcean

Stumbnail - <https://stumbnail.com>

Revenue-generating AI thumbnail SaaS built end to end for paid users.

- Built AI generation, editing, dashboard, authentication, and product workflows.
- Operated the deployed product across frontend, backend, storage, and external AI services.

Tools: SaaS, AI, Next.js, Node.js, Firebase, Vercel

ScreenChat - <https://screenchat.ahmadyaseen.com>

Browser extension that lets users chat with the current page for forms, research, and repetitive tasks.

Tools: Browser Agent, Chrome Extension, AI

LiveBoard - <https://liveboard-zeta.vercel.app/>

Collaborative freeform whiteboard for real-time planning, sketching, and visual work.

Tools: Collaboration, Realtime, Web App

SKILLS

Cloud: AWS Cloud Fundamentals, DigitalOcean Droplets, Compute Provisioning, Virtual Machine Operations, Application Hosting, Deployment Workflows

Operations: Monitoring Fundamentals, Availability & Uptime Operations, Runtime Management, Backup & Recovery Awareness

Security: Cloud Security Fundamentals, Network Access Basics, Identity & Access Fundamentals, Infrastructure Security Basics

Frontend: React, Next.js, TypeScript, JavaScript, HTML/CSS, Tailwind CSS

Backend: Node.js, Express, Python, REST APIs, PostgreSQL, MongoDB

AI: LLM API Integration, Agent Runtimes, AI API Integration, Image Generation Pipelines, Prompt Engineering

Platforms: Supabase, Firebase, Vercel, Git, GitHub

EDUCATION

BS Computer Science

2022 - 2026

IMSciences Peshawar - <https://imsciences.edu.pk>

Focus on Artificial Intelligence and Entrepreneurship. Coursework in machine learning, software engineering, and data structures.

RESEARCH

A review of Software Defect Prediction Models using Machine Learning

2025

Author | AM Research Journal

Reviewed machine learning approaches for software defect prediction and compared effectiveness across common methodologies.
